

Activity Report

Week commencing: 2nd November 2020

Team Shift Activity:

number of shifts:	0
number of taskings:	0
number of patient involvements:	0
number of governance procedures:	0

Solo Activity:	active responders:	SB5854, CB664		
	number of taskings:	7		
	number of patient involvements:	7		
	number of governance procedures:	1		
Tasking Types:				
	<i>trauma</i>	5	<i>adult</i>	7
	<i>medical</i>	0	<i>paediatric</i>	0
	<i>cardiac arrest</i>	2		

Case	Res	Date	Age	gender	type	Job description	S/D	Scene time	Total time	General interventions	Governance interventions	Adverse events
1	SB5854	02/11	75	male	trauma	fall from height	no	01:00	01:10	yes	yes	nil
<i>Additional comments:</i>						fall from 2nd floor balcony - possibly deliberate Traumatic arrest						

						Full HOTT protocol applied Bilateral thoracostomies and right humeral IO by RM ["IO access", "Advanced life support", "LUCAS"] ["Ultrasound (cardiac)", "Immobilisation"] ["Simple Thoracostomy"] - outside property on stone pathway - Bilateral - both lungs inflated – straight-forward procedure joint response - EMRTS applied lucas and performed cardiac ultrasound. PEA decaying into agonal rhythm. ROLE at scene						
2	SB5854	03/11	85	male	arrest	Cardiac Arrest	no	-	-	no	no	nil
	<i>Additional comments:</i>					cardiac arrest CPR ongoing. on arrival patient conscious and breathing. ECG revealed bifascicular block (Right Bundle and left anterior hemiblock) immediate transfer to uhw						
3	SB5854	04/11	-	-	trauma	RTC	no	-	-	no	no	nil
	<i>Additional comments:</i>					police pursuit. rollover etc, car submerged in water filled culvert 90 minutes to remove car from water = confirm no persons in vehicle no bodies identified by police team response WAST EMRTS HART BASICS Police . discussion regarding whether resuscitation should be undertaken if persons recovered from vehicle good team response, thankfully not needed						
4	CB664	05/11	-	male	trauma	27D04S – reported stabbing	no	-	-	no	no	nil
	<i>Additional comments:</i>					The sole casualty had presented to a neighbour's house claiming to have been stabbed during the course of a burglary at a location nearby. He had then been able to walk up the lane to his home. examination revealed the casualty to be intoxicated and obstreperous but with only a single laceration over his l eye with no active bleeding. He persistently resisted detailed examination of and attention to his wound and declined to be taken to hospital. I stood by at neighbour's house until police arrived and then Followed a firearms unit who led the way and located the casualty A Further firearms unit arrived and I was then called forward to examine the patient. CTL, RRV, EA, Helimed57 and police helicopter all tasked to incident.						

5	CB664	05/11	50	male	trauma	29D03 2 vehicle RTC	yes	-	-	yes	no	nil
						<i>Additional comments:</i>	<p>"head on collision van vs car" - on road with nominal speed limit 30mph.</p> <p>Examination and review of observations - (casualty had been wearing seatbelt and airbag deployed).</p> <p>Initial concern about significant chest injury given severity of sternal pain.</p> <p>Clinical examination did not reveal evidence of chest injury, casualty remained haemodynamically stable and ECG x2 = normal.</p> <p>["IV access"] - 16ga cannula to L ACF for morphine.</p> <p>Penthrox supplied with good effect in combination with opiate - Penthrox - 3.0mls</p> <p>Stood down about 200m away from scene - continued at normal driving speeds to check situation with crew.</p>					
6	SB5854	05/11	-	-	trauma	reported stabbing	yes	-	-	no	no	nil
						<i>Additional comments:</i>	rv point clifton street police station					
7	SB5854	07/11	55	male	arrest	collapse	no	-	-	yes	no	nil
						<i>Additional comments:</i>	<p>patient witnessed to collapse and fall face first into water at roach park lake</p> <p>on arrival, conscious and breathing. had bitten lip. discussion with relative - alcohol dependency, has not had a drink in 3 days</p> <p>probable withdrawal seizure</p> <p>["IV access"]</p> <p>["Assisted Transfer"]</p> <p>discussed with resus in uhw, appropriate to transfer directly, will need pabrinex and ? benzodiazepines</p> <p>transfer time 2-3 minutes, so cannulated en-route.</p>
