<i>Additional comments:</i>						3 vehicles involved - crew request given 4 potential casualties and 1 trapped. A female casualty had been extricated by F&R and was on a trolley by the time I arrived. Mr C Shaw arrived moments later. The casualty was already immobilised and had been given analgesia for a partial amputation of the L thumb. she was reported to have been GCS 15 but had no recollection of the incident and it seemed likely that she had been unconscious for a period She had multiple abrasions/shallow lacerations but was haemodynamically stable with no other significant injuries.						

						The casualty was discussed with Tim Austin on the Trauma Desk and it was agreed that Morriston would be the destination for her. The two other casualties were checked by CS and found not to have sustained any significant injury.

There was no evidence of significant injury and he did not meet any of the criteria for discussion with Trauma desk - he was conveyed to Morriston.
