

Activity Report

Week commencing: 11th January 2021

Team Shift Activity:

number of shifts:	1
number of taskings:	2
number of patient involvements:	1
number of governance procedures:	0

Team Shift:			
Date:	15/01/2021	Duration:	08:51
		Personnel:	CS, JK, TA
No. of taskings			
<i>trauma</i>	1	<i>adult</i>	0
<i>medical</i>	1	<i>paediatric</i>	0
<i>cardiac arrest</i>	0		
Pre-shift issues	nil	Post-shift issues	nil
Pre-comments	nil	Post-comments	nil

Case	Age	gender	type	Job description	S/D	Scene time	Total time	General interventions	Governance interventions	Adverse events
1	57	male	trauma	Bariatric fall	yes	-	-	no	no	nil
	<i>Additional comments:</i>			Stood down on way. Mob18:18, Stand down 18:55						
2	29	female	medical	Status	no	-	-	yes	no	nil
	<i>Additional comments:</i>			["IV access"] Benzodiazepines 10mg diazepam x2, airway suctioned Ground escort to pph Mob 2244, At2303, Clear 2347

Solo Activity:	active responders:	DR01, SB5855, CB 664, SB 5866, SB 5854, CB 5851
	number of taskings:	8
	number of patient involvements:	7
	number of governance procedures:	1
	Tasking Types:	
	<i>trauma</i>	5
	<i>adult</i>	8
	<i>medical</i>	2
	<i>paediatric</i>	0
	<i>cardiac arrest</i>	1

Case	Res	Date	Age	gender	type	Job description	S/D	Scene time	Total time	General interventions	Governance interventions	Adverse events
1	DR01	11/01	42	female	medical	Aggitated	no	00:30	01:19	yes	yes	nil
	<i>Additional comments:</i>					IB Migraine symptoms 24hrs, today decreased GCS and agitated Crew gave 5mg diazepam with some improvements but still unable to move ["Pre-hospital Sedation"] decision: 18:25, start 18:30, finish 18:35 location: bedroom, indication: extrication Oxygen, etCO2 monitoring 1mg midazolam observations stable						
2	SB5855	13/01	58	female	trauma	Fall – ankle injury	no	-	-	yes	no	nil
	<i>Additional comments:</i>					Lady fell and leg folded under her. High BMI - 30 stone Left foot rotated 180 degrees. Crew not able to get IV Access IN Fentanyl 80 mcg, then further doses through (50mcg + 50 mcg) IO access						

						extrication						
3	CB664	15/01	79	male	medical	31E01	no	-	-	yes	no	nil
	<i>Additional comments:</i>					male patient 1 week post lap chole and known COVID positive. "just breathing", SpO2 73%, reduced conscious level. BP ~75mmHg. T=34.7. CBG 5.3mmol/l As for sepsis/covid. o2 - 15/min via nrbfm; 1l warm saline. conveyed to morrison; EA was dual tech crew but paramedic from RRV escorted. red call noted on c3 radius to be very near my home						
4	SB5866	17/01	83	male	arrest	Cardiac Arrest		-	-	yes	no	nil
	<i>Additional comments:</i>					COVID + T2 DM HTN SOBar +++> Cardiac Arrest on RRV arrival. Sms for assistance "asystole" P2P with CTL : now pea, then ROSC. Asked to attend Re-arrested by my arrival. 4h/4t addressed. Not a survivable episode ROLE in pea>asy within 5mins. Bad news broken to family. 1) SWAST have a role outside JRCALC checklist - do WAST? 2) Could this have been discussed with east senior clinical advisor?						
5	17/01	SB5854	18	male	trauma	RTC	no	-	-	yes	no	nil
	<i>Additional comments:</i>					High speed rollover RTC driver self-extricated						

						["IV access"] ["Immobilisation"] - Immobilised due to mechanism No obvious injury observations stable (BP 115/85, pulse 65, Resps 20, GCS 14/15) Trauma Triage tool applied. Transferred to GUH Llanfrechfa. a few minutes out BP dropped to 85 systolic, pulse remained 60 , gcs 15. transient hypotension with systolic 85-90 for 10-15 minutes, bp then 105 systolic (no intervention) Trauma CT awaited Consultant observed that 30% of patients with internal haemorrhage presented with normal pulse or relative bradycardia in the presence of hypovolaemic shock. awaiting CT result. abdomen soft, non tender, no external bruising.							
6	17/01	SB5854			trauma	Stabbing	no	-	-	no	no	nil	
	<i>Additional comments:</i>					Advised stabbing outside Huggard centre, possibly multiple patients, I was requested to attend, as I had just cleared from (incident below) one patient identified, head injury from a spanner, GCS 15, haemodynamically stable, no clinical concerns. Paramedics at scene happy to manage							
7	17/01	SB5854			trauma	Stabbing	no	-	-	no	no	nil	
	<i>Additional comments:</i>					stabbing, possibly 2 patients. Arrived at scene to disorderly behaviour by patients. one patient tasered by police. the others then complied. all minor superficial cuts and grazes. I reviewed the patient who had been tasered, small laceration to right hand, not requiring sutures. Patient became increasingly agitated (drugs and alcohol positive) behaviour was such that i could not safely perform observations. GCS 15, good radial, well perfused. appropriately restrained, placed in van. Head butted door forcefully x 4. Officers then restrained further. Transferred to custody. I liaised with custody medic to explain situation. aware of self-inflicted head trauma, planned to observe closely							
8	CB5851	16/01			trauma	29D07 RTC	yes	-	-	no	no	nil	
	<i>Additional comments:</i>					come off back (? that should be bike), hit kerb Discussed with ASD as almost an hour ETA, they had nothing to send and requested me to mobilise, then stood me down before getting off driveway as recoded conscious and 4 assets in attendance???
