Case	Res	Date	Age	gender	type	Job description	S/D	Scene time	Total time	General interventions	Governance interventions	Adverse events
1	SB5854	16/11	-	male	trauma	Patient stabbed to chest	no	-	-	no	no	nil
	<i>Additional comments:</i> on arrival patient haemodynamically stable, well perfused, sats 97% on air, auscultation = vesicular breath sounds all areas. NOTE: wound in the anterior axillary line 6th ICS potential for deterioration immediate transfer to UHW											
2	SB5854	16/11	-	-	trauma	RTC	no	-	-	no	no	nil
	<i>Additional comments:</i> Rollover RTC, vehicle into trees on the a4232. high speed etc, driver unresponsive/ fatality on arrival, patients had self-extricated, no injuries complained of, or identified ea on scene, so advised continue to UHW as planned											
3	CB664	19/11	77	female	arrest	Acute Breathlessness/Cardiac Arrest	no	-	-	no	no	nil
	<i>Additional comments:</i> - acute breathlessness and then collapse/Cardiac arrest after several days of D&V. - crew request for assistance. - by the time I arrived CPR had been ongoing for 45 minutes without ROSC at any stage. the patient was in pea despite interventions and further efforts were judged futile. - the patient had been intubated but had been difficult to ventilate - pneumofix needles had been deployed reportedly with escape of air but with subsequent development of surgical emphysema											

						<p>- the capnography line had blocked repeatedly after showing ETCO2 of "6" initially</p> <p>- the crew had been perplexed by secretions +++ via the ETT</p> <p>- the patient's abdomen had been noted to be distended and this had become severe.</p>						
4	CB664	20/11	33	female	trauma	29D02M – hit by car	no	-	-	yes	no	nil
	<i>Additional comments:</i>					<p>outside PH</p> <p>Obvious # of L ankle.</p> <p>["IV access"] - 20ga IV cannula to R ACF,</p> <p>Morphine 15mg (total) IV.</p> <p>Paracetamol 1g IV.</p> <p>Ondansetron 4mg IV.</p> <p>Assisted EA crew with extrication.</p>						
5	SB5854	19/11	-	-	trauma	House Fire	yes	-	-	no	no	nil
	<i>Additional comments:</i>					<p>Persons trapped. Stood down enroute. No patients identified</p>						
6	SB5854	21/11	16	male	trauma	Stabbing	no	-	-	yes	no	nil
	<i>Additional comments:</i>					<p>Large scale disturbance. Patient stabbed to chest x 1</p> <p>EMRTS on scene. 14 g cannula placed in the Right ACF</p> <p>tranexamic acid given . rapid evacuation to UHW</p> <p>["IV access"]</p> <p>Joint response with EMRTS. EMRTS gave blood products</p>						
7	SB5854	20/11	-	male	trauma	Shooting	no	-	-	no	no	nil
	<i>Additional comments:</i>					<p>Male shot in chest</p> <p>Police advise Firearm known to be at this address</p> <p>Liaised with EMRTS and HART</p> <p>No patient identified after 30 minutes stand by!!</p>						
8	SB5854	22/11	-	-	trauma	Self-harm	no	-	-	no	no	nil
	<i>Additional comments:</i>					<p>self inflicted lacerations to arms. patient distressed ++</p> <p>calm engagement over 30 minutes or more. walked to ambulance (option was police restraining him !)</p>						
9	SB5854	22/11	-	-	trauma	RTC	yes	-	-	no	no	nil

	<i>Additional comments:</i>					rollover RTC 32-30 eastbound stood down - car had fallen off transporter. no persons involved						
10	SB5854	22/11	77	female	trauma	RTC	no	-	-	yes	no	nil
	<i>Additional comments:</i>					head on collision on a4119 patient trapped by intrusion to driver compartment. GCS 15, haemodynamically stable ["IV access"] ["Immobilisation"] fentanyl – 100 mcg extrication on backboard mobilised. transfer UHW EMRTS also in attendance						
11	CB664	22/11	67	male	medical	patient deceased	no	-	-	no	no	nil
	<i>Additional comments:</i>					A known diabetic with complications thereof had been found dead several weeks after last having been seen. no other resource available formally to ROLE The patient was clearly in an advanced state of decomposition and a PRF was made out to that effect						
12	CB664	22/11	22	female	trauma	29D05 – RTC	no	-	-	yes	no	nil
	<i>Additional comments:</i>					The casualty had been driving her small hatchback and had noted problems with the steering There had been a sudden deviation from the intended direction of travel and she collided with at least one other vehicle on a road with a nominal speed limit of 40mph. Jointly with CTL. Monitoring and analgesia during extrication from vehicle. The casualty was complaining of pain in neck, back and R wrist/forearm/hand She had numbness in her L leg with an inability to move that limb. She was and remained GCS 15 and haemodynamically stable. Plan A extrication courtesy F&R. In the EA she was noted to have pain also in R shoulder, a fixed flexion deformity of L hip and tenderness in LUQ of abdo/over lowermost L ribs. Call to Trauma Desk resulted in her being triaged to UHW.						

13	CB664	21/11	75	male	trauma	RTC	yes	-	-	no	no	nil
						<i>Additional comments:</i>	Nil - stood down and reallocated to another RTC					
14	CB664	21/11	22	female	trauma	RTC	no	-	-	no	no	nil
						<i>Additional comments:</i>	<p>RTC - 2 occupants in rollover on road with nominal speed limit 30mph.</p> <p>The male driver (27) and his female passenger (22) had both been wearing seatbelts and had self-extricated</p> <p>Both had been able to mobilise independently thereafter.</p> <p>The male was seen in the back of a police van having been arrested for driving under the influence.</p> <p>He was clearly intoxicated but his only injury appeared to be abrasions to his R knee. He was discharged in the care of the police.</p> <p>The female had walked to the fire station nearby and was complaining only of headache.</p> <p>no injuries were apparent and she was discharged to be collected by her father.</p> <p>the female casualty called for an ambulance the following morning complaining of headache, neck pain and blurred vision</p> <p>she was conveyed to Morriston hospital - outcome unknown.</p>
