

Activity Report

Week commencing: 25th January 2021

Team Shift Activity:

number of shifts:	1
number of taskings:	3
number of patient involvements:	2
number of governance procedures:	0

Team Shift:			
Date:	30/01/21	Duration:	06:45
		Personnel:	JW, BE, RL
No. of taskings			
<i>trauma</i>	3	<i>adult</i>	2
<i>medical</i>	0	<i>paediatric</i>	1
<i>cardiac arrest</i>	0		
Pre-shift issues	nil	Post-shift issues	vehicle issues
Pre-comments	nil	Post-comments	car - consistent brake pad warning car - oil low intermittent warning (stated 'ok to drive' but 'add oil'). gauge showing low end of range.

Case	Age	gender	type	Job description	S/D	Scene time	Total time	General interventions	Governance interventions	Adverse events
1	19	male	trauma	Knee injury	no	-	-	no	no	nil
	<i>Additional comments:</i> crew request - dislocated patella, difficult analgesia despite Entonox reduced just prior to our arrival, no input needed. had planned iv fentanyl for analgesia on route, to facilitate assessment (as agreed ketamine probably excessive)									
2	16	female	trauma	DSH	yes	-	-	no	no	nil
	<i>Additional comments:</i> 16 yr old female, slit wrists, unconscious ?breathing. call to police									

				hoax call - stood down on arrival by ea crew & police several speed cameras along newport road - unsure if all activated. alloc 21:02:01; at scene 21:07:53 (times from cad)						
3	50	female	trauma	stabbing	no	-	-	yes	no	nil
	<i>Additional comments:</i>			attacked in property, punched & multiple stab wounds. wounds to face, neck. blood ++ at scene & on patient's back. on further assessment, blood on back appeared to be from head wounds major wound = deep lac to occiput. bleeding profusely. controlled effectively with celox & pressure dressing. GCS 15, no ongoing bleeding, conveyed to UHW with trauma pre-alert. ["IV access"] ["Assisted Transfer"] TXA 1g, ondansetron 4mg request from ecch - emrts committed to another tasking. initially mobilised to scene once free (from UHW) but stood down once haemorrhage control achieved with celox and patient in ambulance [no pre-hospital blood requirement]						

key – Res = responder, S/D = stood down?, time = hour:mins

Solo Activity:	active responders:	SB 5855, SB 5866, CB 664, SB 5854	
	number of taskings:	9	
	number of patient involvements:	6	
	number of governance procedures:	1 1 x by EMRTS	
	Tasking Types:		
	<i>trauma</i>	6	<i>adult</i> 8
	<i>medical</i>	1	<i>paediatric</i> 1
	<i>cardiac arrest</i>	1	
	<i>other</i>	1	

Case	Res	Date	Age	gender	type	Job description	S/D	Scene time	Total time	General interventions	Governance interventions	Adverse events
1	SB5855	27/01	30	female	trauma	Fall down stairs	no	-	-	yes	no	nil
	<i>Additional comments:</i>					team response - IB collected CM en route 30yo witnessed by her young children to fall down ?12-13 steps inside property. Found unconscious by her husband, 999 call made and CPR began as instructed by call handler On crew arrival GCS 11/15 - CPR stopped ["IO access"] ["Immobilisation","Assisted Transfer"] Extricate from confined space. pelvic binder, immobilised, IO access, GCS improved to 15/15 en route. UHW trauma call. CM travelled with crew. H/O to trauma team (Matt Et al.)						
2	SB5866	28/01	62	female	medical	Catastrophic Bleeding	no	-	-	yes	no	nil
	<i>Additional comments:</i>					SMS: "velindre 63yo catastrophic bleed pv now in arrest" Not in arrest. Endometrial ca, bleeding >1000mls (650 in suction) but had 1 PRBC Yesterday and 2 PRBC today. Plan was to send back to PCH, but then syncope>Red call.						

						["IV access"] ["Drugs outside JRCALC guidelines (non-governance)"] Calcium gluconate 30mls Bp 150/x hr 95-120 s.tachy. Senior decision making. UHW as Gynae expected not PCH. (Rmo kindly arranged this) IV access, full bloods to take with us to UHW, Vbg (ph 7.45, lac 1.4, Ca <1.0) Packaged by WAST and escorted UHW Crew correctly identified better to transfer locally given degree of blood loss even though bp not compromised.							
3	SB5866	28/01	<1	female	arrest	neonatal arrest	yes	-	-	no	no	nil	
	<i>Additional comments:</i>					Not an arrest, stood down. (Diverted initially from Velindre tasking then reassigned)							
4	CB664	29/01	40	male	trauma	29D01H Car vs building	no	-	-	no	no	nil	
	<i>Additional comments:</i>					Nil - Driver left scene							
5	CB664	29/01	20	male	trauma	29D02M	no	-	-	no	yes - EMRTS	nil	
	<i>Additional comments:</i>					transpired that the casualty had jumped off the footbridge 12m above the carriageway. Head injury, ?facial #, + #L wrist and R ankle. Intermittently agitated. Nil from me. WAST personnel had packaged and EMRTS (Ian & Elliott) arrived shortly after I did and undertook PHEA and escort to UHW.							
6	SB5854	30/01			trauma	Multivehicle RTC	no	-	-	yes	no	nil	
	<i>Additional comments:</i>					Car travelling up Malpas Road in Newport, crossed central reservation, glancing impact with taxi, head on impact with works van Driver and passenger in car were unrestrained in total 8 patients. initial reports suggested death at scene (Driver of car)> police estimate speed of car 90-100mph front wheels detached from car on impact with van, debris covering Over 50m or more Driver of car initially unconscious. woke up, self extricated. GCS 14 (V - 4) large frontal haematoma. All others involved walking wounded. 3 x males in van = refused examination, passengers in Taxi assessed by paramedics and discharged at scene. Driver of car – UHW, passenger - GUH (Complaining of c-spine pain, and pain/swelling in right knee Mechanism significant, police first at scene predicted fatalities. Thankfully good outcome							
7	SB5854	30/01		male	trauma	stabbing, central wounds	yes	-	-	no	no	nil	
	<i>Additional comments:</i>					Stood down, minor injuries							

8	CB664	30/01	18	female	other	attempted self-strangulation	yes	-	-	no	no	nil
<i>Additional comments:</i>						Nil - WAST personnel first on scene indicated that I was not required						
9	multiple	31/01	33	female	trauma	Person vs train @ level crossing	no	-	-	no	no	nil
<i>Additional comments:</i>						multiple responders – SB5866, SB5854 WAST ROLE by my arrival (~16mins post call) ~At pt call +22mins. Liaison with train crew & also distressed male who arrived at scene ? casualties partner. Unclear of exact time call>role. Obvious Hi + all limbs fractured. No obvious cerebral destruction, though injuries most likely incomparable with life at call +20mins with no CPR started. WAST PCR 12418995 by EA crew & CTL (Lda) Driver of train counselled. Female PCSO counselled (her first train v person job) Family of deceased arrived - Dr Creed spoke with them.
